EDUCATION

Carnegie Mellon University **Pittsburgh, PA**
M.S. in Information System Management (GPA 3.53) 2021/09 – 2022/12
Course: *Data* structure, OOP in Java, Computer Systems, Web app, Database, Distributed Systems, Data Science

National Taiwan University of Science and Technology **Taipei, Taiwan**
Certificate of Computer Science, 2 Courses (GPA: 4.0) 2020/02 –2020/06

National Taiwan University **Taipei, Taiwan**
B.S. in Accounting (GPA 3.7) 2011/09 –2015/06

WORK EXPERIENCE

Full-stack Software Engineer Intern – Salesforce.com 2022/05 – 2022/08

- Developed a health check tool automatically checking contact center configuration and sending out checking report to customer admin users.
- Increased customer service efficiency with visualized health check process and configuration helper link.
- Built frontend in **Aura, LWC, HTML, CSS, Javascript** and wired up backend function in **Java**.
- FutureForce Equality Mentorship FY23 Mentee focusing on Salesforce inclusivity goals and awareness.

Risk Analyst Intern – Kronos Research (High-Frequency Trading Company) 2021/04 – 2021/07

- Developed backend infrastructure and implement pipeline to ingest data from 5+ Crypto trading platforms (Kraken Futures, Okex, Crypto.com, etc.) and transform data to usable internal format **[Python, RestAPI, Websockets, MySQL]**
- Implemented analytical tools to visualize trading performance for trader's daily performance review, detected risk in portfolios and reduced potential loss. **[Grafana]**
- Reduced 10% time in reconciliation by automating variance detection in database and pipeline recalculation. **[Python]**

Senior Associate (Data Specialty) – PriceWaterhouseCoopers Taiwan 2015/09 – 2019/06

- Led $13M I.P.O cases of biotech companies. Decreased 10% of potential tax liability by refactoring biotech company's revenue allocation with solid industrial research and reliable increasing cash flow.
- Automated the inventory age calculation and sample selection function with VBA and reduced 20% of the time.
- Trained and supervised 3 associates to accomplished seasonal review and annual reports.

PROJECT EXPERIENCES

CMU Food Ordering Platform [Javascript, Django, MySQL]

- Created a web page that enables CMU students to efficiently order food and track orders from restaurants on campus. Use AJAX to update and reflects the inventories that are currently in stock.
- Found the closest restaurant with geolocation API and assign the order accordingly. Handled payments with Stripe API. Deployed with **AWS ECS**.

Scent Capturer – Scent Trend Recommendation System [Python, MySQL]

- Created a dashboard that shows the market's current trend of perfume in terms of brands, scent, etc.
- Web crawled from 3+ e-commerce websites and mapped scent information with fragrance encyclopedia.
- Visualized review and ranking results with Matplotlib.

LEADERSHIP EXPERIENCE

Project Manager - Honda Telematics Data Road Mapping & Traffic Flow Forecast (2022)

- Manage a team of 7 members and ensure each individual understands all aspects of the prime goals. Worked closely with the instructor to negotiate, analyze, and prepare for the response to client's requests.
- Built and trained models to predict average annual daily traffic on roads with sparse detectors. .

Event host – Accounting Annual Social Event (2012)

- Led a team of 50+ students, brought out 12 dancing performances and drama in half a year.
- Attracted 300+ audiences through a series of marketing strategies.

SKILLS AND TECHNOLOGIES

Programming: C, Java, Python, JavaScript, HTML5/CSS3, Object-Oriented Design & Programming

Framework and database: Django, React, MySQL, MongoDB

Big Data and Machine learning: Hadoop, Spark

Tools: RESTful API, Websocket, AWS(EC2, Lambda, S3), Docker, Git, Linux, Jenkins, gdb
